

Open House 2023

Roman White, a current sophomore student in LOC Information Assurance and Cyber Defense Concentration, helped recruiting potential students during the Open House hosted by LOC Center for Cybersecurity, LOC Division of Computer Science, and LOC Office of Admission on November 30, 2023 at 103 Gibson-Orgill Mathematics and Science Learning Center on LOC campus.

As shown in photo above, Roman White (the second from right) was tutoring visiting high school students to try on Oculus Quest 2 Virtual Reality (VR) headsets with hand controllers. These headsets were taken from LOC Network and Cybersecurity Lab

As shown in photo above, Roman White (the third from left) was teaching how to make two robots compete in a crawling race to visiting high school

students. These were Synthiam Ez-B Six-Bare spider like robots, also from LOC Network and Cybersecurity Lab. The photo below depicts the moment when competing robots almost reached the finish line.
