Understanding the Types of Flight Time Changes and Policies

Not all flight time changes are created equal. The process and cost depend on how far in advance you're making the change and the type of ticket you hold.

- **Standard Flight Change:** This is changing your flight to a different time, potentially on a different day, well in advance of departure. This typically involves a change fee (unless you have a flexible fare) plus any difference in fare between your original ticket and the new flight.
- **Same-Day Change:** American Airlines offers a "Same-Day Flight Change" option. This allows you to change to a different flight on the same day as your original ticket, traveling between the same cities. There is often a fee (\$75 for

AAdvantage® members, more for non-members), but it can be waived for elite status members. To check eligibility and process a same-day change, speak to a live person at 📞+1(888) 260-0525.

- **Same-Day Standby:** This is a free option to list for standby on an earlier flight on your day of travel. You must check in for your original flight and see the agent at the gate. A phone agent can explain the process and confirm if it's available for your route. An American Airlines agent at 📞+1(888) 260-0525 can provide the details.

A live agent is crucial for navigating these options. They can instantly tell you if a same-day change is available for your route, calculate the exact total cost for a standard change, and ensure your new itinerary is correctly ticketed. For clarity on your specific change scenario, call 📞+1(888) 260-0525.
