Windows 8.1 activation code

Support Number: +1 (844) 886-3118 Windows 8.1 activation can typically be done online or by phone. If you are encountering the error code **0x8007007B**, it usually indicates a problem with the activation process, often related to the product key or the system configuration. Here are some steps to troubleshoot and activate Windows 8.1 successfully:

Troubleshooting Steps

1. **Check Your Product Key**:
   - Ensure that you are using a valid product key for Windows 8.1. Double-check for any typing errors.
2. **Run the Activation Troubleshooter**:
   - Go to **Settings** > **Update & Security** > **Activation**.
   - If there's an option for troubleshooting, select it. This can help identify issues with activation.

3. **Use Command Prompt**:
   - Open Command Prompt as an administrator.
   - Type the following command to check the activation status:

bash

```
slmgr.vbs /ato
```

1.
   - This command attempts to activate Windows online.
2. **Check Internet Connection**:
   - Ensure that your internet connection is stable. A poor connection can lead to activation failures.

3. **Change DNS Settings**:
   - Sometimes, changing your DNS settings can help. You can use Google DNS:
     - Go to **Control Panel** > **Network and Internet** > **Network and Sharing Center**.
     - Click on your network connection, then **Properties**.
     - Select **Internet Protocol Version 4 (TCP/IPv4)**, then click **Properties**.
     - Choose **Use the following DNS server addresses** and enter:
     - Preferred: `8.8.8.8`

     - Alternate: `8.8.4.4`
1. **Activate by Phone**:
   - If online activation fails, you can try activating by phone:
     - In the activation window, select "Activate by phone."

       ○ Follow the prompts to get a confirmation ID.

1. **System Configuration Check**:
   - Ensure that your system clock is set correctly, as incorrect time settings can interfere with activation.

2. **Reinstall Windows**:
   - If all else fails and you have a backup, consider reinstalling Windows 8.1. Ensure that you have your product key before proceeding.

Additional Considerations

- If you have upgraded from a previous version of Windows, ensure that the upgrade was completed successfully.**+1 (844) 886-3118**

- If your Windows 8.1 was previously activated on another machine, it may need to be deactivated there before activating it on the current machine.

If you continue to experience issues after trying these steps, it might be helpful to contact Microsoft Support for further assistance.
